

# HP Workpath apps

Expanding your MFP capabilities

[Speaker's name, title]

# Megatrend: transforming the office to digital workplaces

EVERYTHING  
MOBILE

EVERYTHING  
AS A SERVICE

EVERYTHING  
SMARTER

EVERYTHING  
SECURE

# Many workflow processes still begin with paper

Users need an easy way to integrate scans into digital records

As a **nurse**, I need to scan lab results from my patient and attach them to her medical record

As a **lawyer**, I need to scan physical evidence related to my client and attach it to case records

As a **teacher**, I need to scan a test and attach it to a student file

As an **accountant**, I need to scan invoices and attach them to our accounting system

As a **banker**, I need to scan my client's documentation provided as part of their loan application

As an **HR specialist**, I need to scan employee IDs and HR forms when onboarding new employees

# Think differently about your printer

---

Connect written homework assignments with a class gradebook

Integrate X-rays, MRIs, and lab results into patient charting systems

Attach scanned receipts to expense accounting systems

Route financial documents to core banking and record management systems

## Unlimited possibilities to Enhance the usage of MFPs

- Mobile payment apps
- Shipping solutions that weigh parcels and print a customized postage label
- 3D scanners
- Climate control for offices
- Motion detectors

# HP Workpath apps can streamline workflows

## Streamline processes for connecting paper documents to digital workflows

### Current workflow

1. Authenticate at the device
2. Select email
3. Enter email address
4. Scan document

5. Walk back to PC
6. Open email
7. Download attachment
8. Delete email

9. Log onto application
10. Select client or case
11. Upload document
12. Enter required data
13. Delete document from PC

### Traditional process is:

- Manual
- Error prone
- Not traceable
- Not secure/compliant
- Computer dependent

### Workpath app workflow

1. Authenticate at the device
2. Select app
3. Scan the document into the automated digital workflow

Customized apps  
improve the  
customer experience

# Create intuitive user experiences

Working in the MFP touchscreen interface eliminates steps.

Scans can be securely sent from the MFP directly to the third-party repository.

Users enjoy similar interfaces as third-party software.

# Designed for security

---

Workpath apps are protected by robust security measures:

- ✓ Dynamic whitelisting
- ✓ HP Sure Start-protected platform
- ✓ Card and OpenID integration
- ✓ HP Connection Inspector monitors network traffic
- ✓ Admin-only app configuration
- ✓ Automatic security updates

# How to access Workpath apps

Integrating apps into existing MFPs maximizes value for teams—and may even reduce the need for additional office equipment, such as desktop computers that support document workflows

1

Ask your print services provider to provide an overview of available apps, or visit the Global Solutions Catalog at [hp.com/go/gsc](http://hp.com/go/gsc)

2

Select the apps that will give your users the most convenience and time savings

3

Have your service provider install the selected apps

Like mobile apps, some will be offered at no charge while others may have a subscription fee associated

# Cloud model customer benefits

## Always secure

You can trust that your app hasn't been modified with HP's online security validation and whitelisting. Count on containerized applications with managed updates

## Always connected

Your information is always accessible, even when you're working in a different location

## Always simple

Automated cloud sign in—HP Sign In Once is integrated with the standard device access control solutions

# App customization

# Customizing apps for HP MFPs

---

In addition to the public Workpath apps on HP Command Center, you can have apps created or customized for your unique business needs\*

Regional and customer-specific apps

Use-specific apps

3<sup>rd</sup> party developer apps

Custom workflow solutions

# Transforming for today and the future

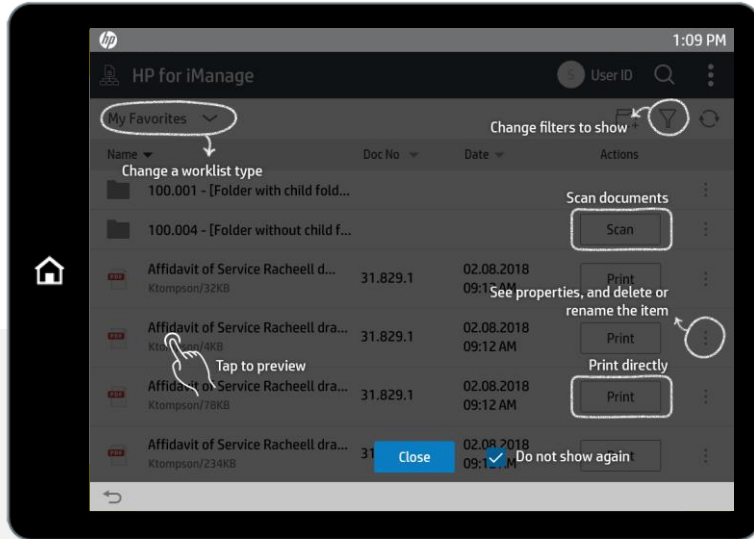

Turn MFPs into IT assets

Evolve the uses of the printer

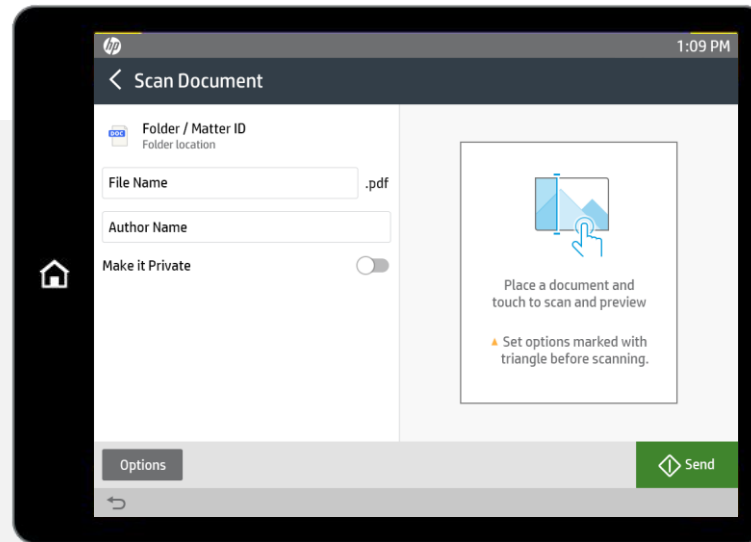

Create the feel of mobile apps

# Example app for legal

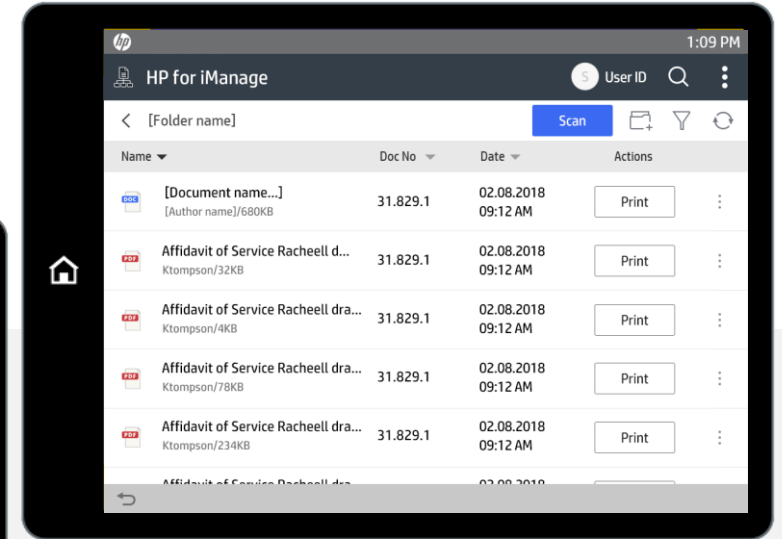

Users can work faster and more securely by accessing key tasks at the device

Count on simple, effective workflows with an easy-to-use UI

Easily access the features you use most

Effortlessly access the files you need—right at the device

# Open-source apps from HP

Apps can be easily customized or tailored to your specific business need

## Partnerships at launch

- HP for OneDrive® Business
- HP for OneDrive
- HP for SharePoint® Online
- HP For Google Drive™
- HP for Box
- Scan to SMB
- Scan to Email
- Scan to FTP
- Secure Access
- HP for Sage Intacct
- HP for iManage
- HP for Clio

## Expected post-launch partnership

- HP for Concur
- HP for Dropbox

The screenshot displays the 'Solutions Catalog(39)' interface. At the top, there are tabs for 'Featured' and 'All solutions', with 'All solutions' selected. Below this is a filter bar with a 'Filter' dropdown, a 'Newest' button, and sorting options 'A - Z' and 'Z - A'. A search bar is also present. The main content area shows a grid of 12 solution cards, each with an icon and a title. The cards are: Secure Access, HP for iManage, HP for Clio, HP for Sage Intacct, Scan to SMB, Scan to FTP, Scan to Email, HP for SharePoint, HP for OneDrive, HP for OneDrive Business, HP for Box, and HP for Google Drive. A 'Clear all' button is located in the top right corner of the results area.

# Backup slides

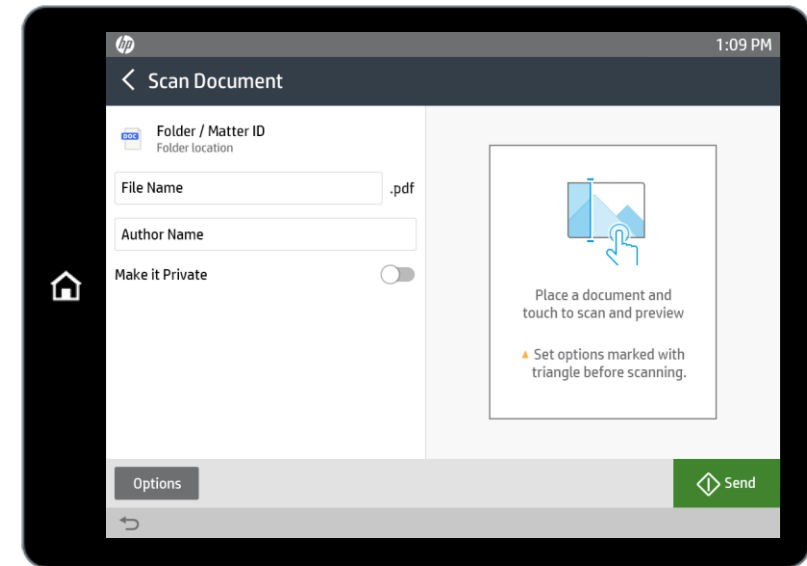

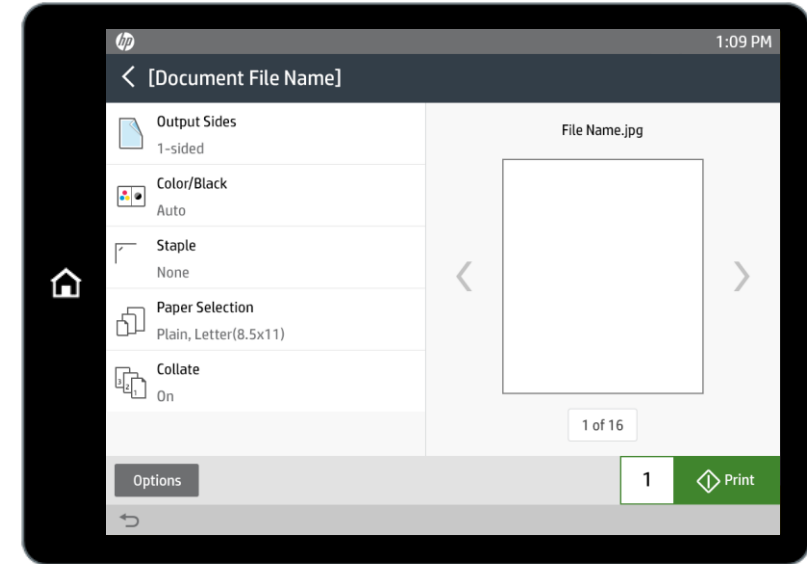

# HP for iManage

**Step 1:** Log in and select HP iManage from the control panel

**Step 2:** Select scan to add to the current folder, or print an item within the folder

**Step 3:** Review scan or output and execute

# Many workflow processes still start and end with paper

As a **nurse**, I want to attach lab results to medical records, plus print discharge documents without a separate device

As a **lawyer**, I need to print exhibits from my matter management system and attach scans of evidence to cases

As a **teacher**, I need to print course materials from the student information system and attach scanned tests to a student file

As an **accountant**, I need to print invoices for clients who prefer paper, plus scan financial records and attach them to our accounting system

As a **banker**, I need to print loan documents for my clients, plus scan client-provided documents and attach them to client files

As an **HR specialist**, I need to print HR documents and scan employee IDs when onboarding new employees
